Visual Studio, Android
Studio

Web

HTML, CSS, React,
Node.js, Firebase

Database

SQLite, MySQL,
Firestore

AI/ML

🌐 LANGUAGES

Afaan Oromoo

(Native)

English

(Fluent)

Amharic

(Good)

📁 PROJECTS

Recommender System for Collaborative Study Groups

Designed and built a web system using Python and SQLite to recommend ideal team members based on skills and availability.

AI-Based Time Management Assistant

Created a task scheduler using AI logic for improved student productivity (React + Flask).

Mobile App for Staff and Student Evaluation

Android app with login, role-based access, evaluation entry, and Room database support.

Student Management System

PHP and MySQL-based full-stack system for course registration and grading.

Personal Portfolio

Ongoing development using HTML, CSS, JS to showcase my projects
