EDUCATION

B.Sc. in Software Engineering
Haramaya University
Expected Graduation: 2027

Motivated Software Engineering student with hands-on experience in developing web, mobile, and database-driven applications. Strong foundation in problem-solving, clean code practices, and version control systems. Demonstrated ability to learn quickly, collaborate effectively in team environments, and deliver reliable, maintainable software using modern development tools. Passionate about applying technical skills to real-world challenges and growing as a professional software developer

---

TECHNICAL SKILLS

Programming Languages
- Python, Java, Kotlin,
- JavaScript, PHP

Web
- HTML, CSS, React,
- Node.js, Firebase

Mobile App Development
- Android (Kotlin, XML),
- Flutter (basic)

Database
- SQLite, MySQL,
- Firestore

Tools
- Git, Figma, Canva,
- Visual Studio, Android Studio

AI/ML

LANGUAGES

Afaan Oromoo ((Native)) • **Amharic** ((Good)) • **English** ((Fluent))

PROJECTS

Recommender System for Collaborative Study Groups ⤢
Designed and built a web system using Python and SQLite to recommend ideal team members based on skills and availability.

Student Management System ⤢
PHP and MySQL-based full-stack system for course registration and grading.

Personal Portfolio ⤢
Ongoing development using HTML, CSS, JS to showcase my projects

EnglishMaster Academy

English Master Academy is a web-based learning platform designed to help users improve English skills through interactive lessons, practice activities, and modern, user-friendly digital learning tools.

FoodieGo ⧉

A production-ready full-stack food delivery application for Ethiopian restaurants and hotels.based on the flutter,nodj

Certificates

Coursera ⧉

completion Certificate for AI Agents and Agentic AI with Python & Generative AI

Udacity ⧉

Data Analysis Fundamentals

AVAILABILITY

Available for software engineering roles, industrial attachment, and any-level opportunities.
